Hazardous Materials
Safety Administration

400 Seventh Street, S.W.
Washington, D.C. 20590

MAY 3 2005

DOT-E 11136
(TENTH REVISION)

EXPIRATION DATE: March 31, 2007

(FOR RENEWAL, SEE 49 CFR § 107.109)

1. GRANTEE: Members of the American Pyrotechnics Association Washington, DC identified in Appendix A and other companies who have obtained party status and are listed in Appendix B of this exemption.
2. PURPOSE AND LIMITATION:
 - a. This exemption authorizes the transportation in commerce of Fireworks, Division 1.3G, UN0335 which are forbidden or exceed the quantity limitations authorized for transportation by cargo aircraft only. This exemption provides no relief from the Hazardous Materials Regulations (HMR) other than as specifically stated herein.
 - b. The safety analyses performed in development of this exemption only considered the hazards and risks associated with transportation in commerce.
3. REGULATORY SYSTEM AFFECTED: 49 CFR Parts 106, 107 and 171-180.
4. REGULATIONS FROM WHICH EXEMPTED: 49 CFR Table § 172.101, Column (9B), § 172.204(c)(3), § 173.27(b)(2), (3) and § 175.30(a)(1) in that an explosive is forbidden by cargo aircraft or the quantity limitation is exceeded.

5. BASIS: This exemption is based on the application of American Pyrotechnics Association, on behalf of their members, dated April 4, 2005, submitted in accordance with § 107.109.
6. HAZARDOUS MATERIALS (49 CFR § 172.101):

Hazardous Materials Description			
Proper Shipping Name	Hazard Class/ Division	Identification Number	Packing Group
Fireworks	1.3G	UN0335	II

The above description applies only to fireworks that have been approved pursuant to § 173.56.

7. SAFETY CONTROL MEASURES:

- a. PACKAGING - Packaging is as prescribed in § 173.62 except that inner packagings must be bags or receptacles that can be tightly sealed to prevent the release of pyrotechnic powders to the outer packaging.
- b. Authorized explosives: Division 1.3 explosives that are not permitted for shipment by air, or are in quantities greater than those prescribed for shipment by air in 49 CFR Parts 100 through 178, may be accepted and transported in cargo aircraft only subject to the conditions stated herein. Explosives carried under the terms of this exemption must be authorized to be transported by common carrier by highway by 49 CFR Parts 100 through 178.
- c. Operations manual: Operations must be conducted in accordance with conditions and limitations specified in the certificate holder's operations manual accepted by the FAA.
- d. Maximum weight: Not more than 2,000 pounds total net weight of explosives may be carried in the aircraft.

MAY 3 2005

e. Authorized persons aboard aircraft. No person other than a required flight crewmember, an FAA inspector, the shipper or consignee of the material or a representative of the shipper or consignee so designated in writing, or person necessary for handling the material may be carried on the aircraft.

f. Advance Notice to FAA Regional Dangerous Goods Manager: The operator of the aircraft must notify the regional Dangerous Goods Manager in the region where the flight will originate. This notification must be given at least 72 hours in advance of plans to operate under the exemption, unless prior arrangements have been made with the cognizant Regional Dangerous Goods Manager. The notification must include the point of departure, intermediate stops, destination(s), and a loading and departure schedule. If a flight schedule deviates more than four hours from the originally scheduled departure time, the operator of the aircraft must notify the cognizant Regional Dangerous Goods Manager. Alternate notification procedures may be established subject to the written approval of the cognizant Regional Dangerous Goods Manager.

g. Advance permission from airport: The operator of the aircraft must have advanced permission from the owner or operator of each manned airport where the material is to be loaded or unloaded or where aircraft is to land while the materials are on board. When the destination is changed after departure because of weather or other unforeseen circumstances, permission from the owner or operator of the alternate airport must be obtained as soon as practicable.

h. Flight plan. For flights within the United States only, the operator of the aircraft must include the following information in the "Remarks" section of each flight plan when the provisions of this exemption are exercised:

(1) The classification of each hazardous material aboard the aircraft.

(2) The net weight of each class of hazardous material aboard the aircraft.

MAY 3 2005

i. Loading and unloading: Loading and unloading operations under this exemption must comply with the following:

(1) The loading and unloading of the aircraft must be conducted at a safe distance from heavily populated areas and from any place of human abode or assembly. However, at an airport where the airport owner or operator or authorized representative thereof has designated a specific location for loading or unloading, the explosives may not be loaded or unloaded at any other location.

(2) Carriage of explosives under this exemption is subject to the same limitations and conditions specified for their transportation by motor vehicle in § 177.835(g) and § 177.848.

(3) The loading arrangements to be used aboard the aircraft for the materials listed in paragraph 6, must be identified in the operator's operating specifications and have been accepted and approved in writing by an FAA-assigned Principal Operations Inspector in accordance with the operator's approved weight and balance program.

(4) During loading or unloading, no person may smoke or carry a lighted cigarette, cigar or pipe, or operate any device capable of causing an open flame or spark within 50 feet of the aircraft.

(5) No fueling operations of the aircraft carried out during loading and unloading of the explosives.

j. Requirements during operation of aircraft: Operation of the aircraft during takeoff, en route, and landing must be conducted at a safe distance from heavily populated areas.

(1) Before movement of the aircraft prior to take-off, and prior to entering an airport traffic area, the pilot of the aircraft must notify the control tower of the class(es) of explosive(s) (including ammunition) on board, and request that this information be

MAY 3 - 2005

released to the appropriate airport officials. This notification must be either communicated by radio transmission or facsimile transmission.

(2) In the event of a diversion from the scheduled route of flight to an airport that was not previously scheduled, the flight crew must notify the control tower during the approach phase of the amount of class of explosives on board and request this information be relayed to the appropriate airport officials. This notification must be either communicated by radio call transmission or facsimile transmission. For airports without control towers, this communication must be made to the Flight Service Station nearest the airport of intended landing.

(3) When under radar control during the approach and landing phase, the pilot must request appropriate vectors so as to avoid heavily populated areas.

(4) Whenever explosives are on board the aircraft, no person on the aircraft may smoke, or carry a lighted cigarette, cigar, or pipe, or operate any device capable of causing an open flame or spark.

k. Pilot requirements: The operator of the aircraft must ensure the following with respect to pilots of aircraft operating under this exemption:

(1) A minimum of two pilots is required aboard any multi-engine aircraft carrying explosives under this exemption.

(2) Each pilot of the aircraft must be provided written instructions stating the conditions and limitations of the operations being conducted and the name of the official(s) granting the advance permission required by paragraph (g) above except when a landing permit has been granted by an agency of the Department of Defense for landing at a military installation.

MAY 3 2005

(3) Each pilot of an aircraft being operated under this exemption must have received formal training on the requirements of 49 CFR Parts 171-180 that are applicable to his duties and be thoroughly familiar with the specific requirements of this exemption.

1. Attendance of explosives: Division 1.3 explosives must be attended at all times they are in the possession of the operator (from the time of receipt from the consignor until time of receipt by the consignee) unless placed in an explosive storage magazine that is approved by the Federal, State or local authority or at a location on a military installation designated by appropriate military authorities.

m. MARKING - In addition to the markings required in 49 CFR Part 172, Subpart D, the outside of each package must be marked "DOT-E 11136".

8. SPECIAL PROVISIONS: The companies identified in Appendix A of this exemption are authorized to offer the fireworks identified in Paragraph 6 for transportation by cargo aircraft only, under the terms and conditions specified herein.

9. MODES OF TRANSPORTATION AUTHORIZED: Cargo aircraft only.

10. MODAL REQUIREMENTS: A current copy of this exemption must be carried aboard each aircraft used to transport packages covered by this exemption. The shipper shall furnish a copy of this exemption to the air carrier before or at the time the shipment is tendered.

11. COMPLIANCE: Failure by a person to comply with any of the following may result in suspension or revocation of this exemption and penalties prescribed by the Hazardous materials transportation law, 49 U.S.C. 5101 et seq:

- o All terms and conditions prescribed in this exemption and the Hazardous Materials Regulations 49 CFR Parts 171-180.
- o Persons operating under the terms of this exemption must comply with the security plan requirement in Subpart I of Part 172 of the HMR, when applicable.

- o Registration required by § 107.601 et seq., when applicable.

Each "Hazmat employee", as defined in § 171.8 who performs a function subject to this exemption must receive training on the requirements and conditions of this exemption in addition to the training required by §§ 172.700 through 172.704.

No person may use or apply this exemption, including display of its number, when the exemption has expired or is otherwise no longer in effect.

12. REPORTING REQUIREMENTS: Shipments or operations conducted under this exemption are subject to the Hazardous Materials Incident Reporting requirements specified in 49 CFR §§ 171.15 - Immediate notice of certain hazardous materials incidents, and 171.16 - Detailed hazardous materials incident reports. In addition, the grantee(s) of this exemption must notify the Associate Administrator for Hazardous Materials Safety -- OHMEA, in writing, of any incident involving a package, shipment or operation conducted under terms of this exemption.

Issued in Washington, D.C.:

for 
Robert A. McGuire
Associate Administrator for
Hazardous Materials Safety

MAY 3 2005

(DATE)

Address all inquiries to: Associate Administrator for Hazardous Materials Safety, Pipeline and Hazardous Materials Safety Administration, Department of Transportation, Washington, D.C. 20590. Attention: DHM-31.

Copies of this exemption may be obtained by accessing the Hazardous Materials Safety Homepage at <http://hazmat.dot.gov/exemptions> Photo reproductions and legible reductions of this exemption are permitted. Any alteration of this exemption is prohibited.
